# Goodbye Business Intelligence Hello Decision Intelligence

The goal of Decision intelligence is to empower employees with insights to make faster more informed decisions to capitalize on opportunities, take corrective measures, and drive innovation.

Meet the data and analytics platform purpose-built to power faster, sharper decisions for the enterprise of the future. Driven by a new class of engine. Streamlining the entire analytics workflow. One platform for any data, any person, any analytics needs. This is the future of intelligent decisions.

Working with Jonny was enlightening. He is consistently thorough and professional and knows the recruitment business and global data driven industry extremely well. Jonny has a great personality and together with his experience and expertise is a pleasure to work with that I personally found to be impressive.

**Ulrich Wrenz**, Director of Sales at Pyramid Analytics

Jonny is an expert in recruiting people in the software and IT industry. He has knowledge of the DACH, Nordics and the international market, and he is my first person to call for recruitment advice and service. Jonny differs from other people in the recruitment industry with his in-depth knowledge of possible issues while helping clients finding the right people for their team. Besides these qualities, he is direct and precise in estimating his client's possibilities on the market. I would always recommend Jonny to anyone in need of a new employee.

**Benjamin Dalby Leksander Doerwald**, Head of DACH at Pyramid Analytics

Thank you again to connect me with Pyramid. It was the best move since I started to work.

**Marcus Erren**, Customer Success at Pyramid Analytics
